

### How to Play Connect 4

- 1) Needs to be played between two people using the same game board (see next page).
- 2) Cut out the questions and place them into a bag or envelop.
- 3) Players take it in turns to pick a question from the bag / envelop for the other person to answer. The answers are on the game board so they must choose which the correct one is or which one is best for them as some questions have a number of possible answers.
- 4) When a player gets an answer right they place their initials (or an O / X) in a box with that answer in and put the question to one side. If they get the answer wrong the question goes back into the bag / envelop.
- 5) The aim of the game is to get four boxes in a row with your mark in them. This can be vertical, horizontal or diagonal.
